Each International Observe the Moon Night, everyone on Earth is invited to learn about lunar science and exploration, take part in celestial observations, and honor cultural and personal connections to the Moon. You can participate from wherever you are. Join hundreds of thousands of observers around the globe by attending or hosting a virtual or in-person event or observing from home.

International Observe the Moon Night has occurred in September or October every year since 2010. This worldwide public engagement program is sponsored by NASA's Lunar Reconnaissance Orbiter mission and the Solar System Exploration Division at NASA's Goddard Space Flight Center, with many contributors and supporters.
